

COVIDX™ SARS-COV-2 RAPID ANTIGEN TEST

FOR PROFESSIONAL USE ONLY

COVIDX PART #	CP0033
WHY COVIDX?	<ul style="list-style-type: none"> ✓ Rapid results ✓ Flexible workflow ✓ Easy-to-use ✓ Hassle-free logistics
SAMPLE TYPE	Nasal swabs or nasopharyngeal swabs; swabs are provided in kit
DETECTION TARGET	Nucleocapsid protein (N protein) antigen
PATIENT POPULATION	Patients suspected of COVID-19 infection within first 5 days of symptoms
TESTS/KIT	25
EXTERNAL CONTROLS	1 set of control swabs provided per kit
SETTING	Testing sites that meet the requirements to perform point-of-care testing
TECHNOLOGY	Lateral flow assay
INTERPRETATION	Visually read (no reader)
TIME TO RESULT	15 to 20 minutes
CLINICAL PERFORMANCE¹	82% PPA, 95% NPA (Nasal swab samples) 89.2% PPA, 100% NPA (Nasopharyngeal swab samples) 100% PPA for samples with Ct values ≤ 30 (All samples)
STORAGE	2-30°C

1. CoviDx [package insert] PM-128.0. Sarasota, FL: Lumos Diagnostics; 2021.

For use under Health Canada Interim Order Authorization only

- Refer to package insert for full performance, warnings, and limitations
- PCR is the gold standard for diagnosing COVID-19
- Testing should follow provincial or territorial guidance and be administered regularly to employees in accordance with the interim guidance on the use of rapid antigen detection tests for identifying SARS-CoV-2 infection
